

Abdul

Batchelor of Civil Engineer

Master of Engineering in "Construction Engineering and Infrastructure Management"

DoB: 13-Sep-1987

PROFILE

Professional Engineer with almost 14 years of working experience in the field of engineering and management with national and international organizations with complex projects in Afghanistan.

Indeed, I have experience of academic research since I did my master theses on the topic of "Critical failure factors of Dam Construction Projects in Afghanistan" via 3 case studies in Afghanistan.

Working in engineering and management fields, having post graduate master degree and dealing with complex projects made me to have strong communication ability, be a good decision-maker, problem solving oriented and have professional organizational leadership skills and ability.

Working with deferent organizations letting me to be strong in identification of organization culture and behavior to select a proper management style and adaptation.
